

Patient: Jane Doe

DOB: 06/21/1960

Report Date: 12/12/2023

Reason for Test:

Patient presents with intermittent chest pain, radiating to the left arm. No history of heart attack. Family history of cardiovascular disease.

ECG Findings:

- Heart Rate: 82 bpm (Normal)
- Rhythm: Sinus rhythm
- PR Interval: 160 ms (Normal)
- QRS Duration: 120 ms (Normal)
- ST Segment: Slight elevation in leads II, III, and aVF
- T Waves: Inverted in leads V1-V2

Impression:

ECG findings suggest possible inferior myocardial ischemia. Recommend further evaluation with stress testing and possibly angiography.
