

Patient: Jane Doe

DOB: 06/21/1960

Report Date: 03/15/2024

History:

Patient has a history of alcohol use and was recently diagnosed with fatty liver disease. Complaints of mild abdominal discomfort and occasional nausea. Denies jaundice or significant weight loss.

LFT Results:

- Total Bilirubin: 1.8 mg/dL (Elevated, normal < 1.2 mg/dL)
- Direct Bilirubin: 0.8 mg/dL (Elevated, normal < 0.3 mg/dL)
- ALT (Alanine Aminotransferase): 88 U/L (Elevated, reference range: 7-56 U/L)
- AST (Aspartate Aminotransferase): 102 U/L (Elevated, reference range: 10-40 U/L)
- Alkaline Phosphatase: 150 U/L (Slightly elevated, reference range: 44-147 U/L)
- Total Protein: 6.8 g/dL (Normal, reference range: 6.4-8.3 g/dL)
- Albumin: 3.5 g/dL (Normal, reference range: 3.5-5.0 g/dL)
- Globulin: 3.3 g/dL (Normal, reference range: 2.0-3.5 g/dL)

Impression:

Elevated liver enzymes consistent with alcoholic liver disease. Recommend continued abstinence from alcohol, repeat testing in 3 months.
